**WHAT'S IN IT?**

**GOLDENSEAL** - This herb is a natural diuretic, eliminating accumulated toxins and water by promoting sweating and urination.†

**CAFFEINE** - Caffeine is a staple ingredient in numerous fat burners since it’s a stimulant that helps burn excess body fat through thermogenesis. In turn, your body temperature increases and so does your metabolism. With caffeine, your body burns calories faster and you can achieve more focus, for better performance.†

**YOHIMBE** - This popular ingredient is well-known for its alpha-2 antagonist and CNS properties. It has been studied that using yohimbe before exercise may promote fat loss.†

**CITRUS LIMON** - This natural diuretic helps curb hunger and decrease bloating, giving your weight loss efforts a boost.†

**WHITE WILLOW** - This natural herb is believed to extend fat burning effects when combined with other ingredients, especially with thermogenic ingredients.†
